- Light Stick or flashlight (with batteries)
- Whistle
- Dust mask
- Walking shoes

### NOTES

- This is not a complete list of items you can/should have in your emergency supply kits. Please remember to think about your needs and the needs of those people in your care while developing your emergency kits.
- It can be expensive to create kits, so buy one item every month for your kit. One more item in the kit is one more resource you will have at your disposal during an emergency. Buy items at thrift stores or dollar stores if possible.
- Rotate your food and water supply at least every six months. A good way to remember is to select months to rotate which have vacation time, such as June/December or July/January.
- Remember to create a family/household plan—so all members know what to do where to report and who to call during an emergency situation.
- In all situations, **THINK** about the best course of action. **COMMUNICATE** the plan of action to those around you and get them to **MOBILIZE** quickly for their safety.
