Agenda and Minutes

1. Approval of Agenda
 - a. 1st A. Pfeifle, 2nd B. Johnson
 - b. Request to table Materials Fees discussion to next Tech Review.
 - c. Request to add discussion regarding updates to DX form.
 - d. Approved, Unanimous
2. Approval of Minutes – April 19, 2022
 - a. 1st K. Douglass, 2nd A. Pfeifle
 - b. Approved, Unanimous

Action Items

1. Curriculum Proposals

Discussion Items

1. Course Materials Fees – Kelly Douglass
 - a. Postponed to next Tech Review meeting.

2. Emergency DX Addendum Form – Kelly Douglass
 - a. At the District Academic Senate, Kelly Douglass presented the recommended change to the DX form. Virgil Lee had concerns regarding changing the form, as certain courses have been approved under the current form’s language. An update to the language regarding the definition of an emergency closure may cause faculty to not want their courses approved for emergency distance education.
 - b. Ann Pfeifle – The original intent to the change was to make the language clearer, but now we are back to where we started. When we established the DX, it was any closure, broadly, such as the closure of a single building.
 - c. Steven Schmidt – The current goal is to clarify the language, not to make the definition narrower.
 - d. Ann Pfeifle – Does the Senate have suggested language?
 - e. Kelly Douglass – No, but it was recommended that there be an opportunity as part of doing this revision for the form to allow different disciplines to say not have their courses approved under a different set of circumstances.
 - f. Ann Pfeifle – Honors wanted a separate DX form specifically for honors. But, the Moreno Valley VPAA suggested that we don’t change an entire system because one group wants a different form. Under the current DX, the honors council can say they do not approve of any emergency distance education.
 - g. Kelly Douglass – The ultimate goal is to no longer have administrators asking the curriculum committee if we are in a situation where the DX form applies. We can clarify that language, but for some disciplines this may create an issue. Still, the disciplines can control the use of DX within the discipline itself and with conversations with the dean. We’ve had administrators who want to use DX to manage hybrid options for when students won’t get vaccinated because our population is responding to the pandemic in different ways.
 - h. Steven Schmidt – We need to be careful about crossing a line where we’re calling something an emergency when it’s just for convenience.
 - i. Brian Johnson – Preferred the original version of the form. If there is a closure, it’s a closure. Once you let classes back on campus it’s no longer a closure and now the district is using DX to decide which classes can be back on campus. Either the campus is closed or it’s open. If there is no closure, then the disciplines need to have a regular DE approval.
 - j. Kelly Douglass – At this point, do we change the form or leave as is?
 - i. Brian Johnson – Leave as is. If a discipline is concerned, they can submit a DE proposal so they can offer it in DE at any point of their choosing.
 - k. Committee agreed to leave DX form unchanged.

Program Documentation

1. New Programs

Regarding all CRP courses: Numbering convention does not make sense and could be a problem when the courses are assembled into programs, but the numbering matches the apprenticeship curriculum numbering system which will streamline it for students.

Some of these courses also look like leveled courses and they do a good job of having related curriculum, but they do not have prerequisites. However, apprenticeships have a very distinct written out pathway for the students.

For almost all courses, the units are made up of a lecture and a lab component -- is there a lecture component in a course at Norco college? No, all lecture/lab is done at the capenter's facility.

For some courses, the lecture and lab content is exactly the same, or the lab content is a copy pasted portion of the lecture. When we look at lab content, it is supposed to be distinct from the lecture content. There have been courses in the past where they are identical. The PCAH also doesn't state that they cannot be the same, although that is not our norm, but it would be desirable for them to be distinct. Apprenticeship, however, really does run the lecture and lab together. The courses are very hands on.

Some content appears to be Welding courses. Some courses will have a welding component because that is a part of the apprenticeship carpentry program. The students are not learning general welding, they are learning welding for carpentry specifically. There is some overlap, and we are expressly charged with preventing that from happening. Because of the apprenticeship rationale, we could go to any accreditation agency and provide that rationale.

There are a number of courses that appear to be duplicates. These courses were updated. Lifting and Bracing safety, one is site awareness, and the second is the actual lifting process. There will be many similarities, but there is contextualization for the courses.
