Std.	There is an opportunity to improve...	I suggest editing/adding...	I suggest editing/omitting...
Example VB7	the way we discuss how we equip faculty to teach online courses. Some of the value we add isn't reflected in the narrative.	1. RCCD hosted a DE Summit in 2017 with a large number of attendees. 2018? 2019? 2. Vince sends weekly emails offering assistance/announcing workshops. 3. We developed a Canvas shell that has a resource page with tutorials, FAQ, etc. 4. DE committee sent a checklist for teaching online courses to MV-All 5. In the summary/evaluation section, I think we need to discuss the request for an on-site instructional designer.	1. There is a reference to Blackboard as our current LMS. This is no longer the platform we use. 2. There is a lot of content about the canvas adoption. This isn't really what the standard is looking for. 3. The count of online, hybrid, FTF courses does not look accurate to me. Is this the most current?
