### **GENERAL INFORMATION**

- Most professional anthropological jobs require a graduate degree.
- Those interested in anthropology may specialize in one of its four branches: archaeology, cultural anthropology, linguistics, or physical anthropology. Many subfields exist within the larger specialties such as forensic anthropology, a subfield of physical anthropology. Typically students take a general curriculum as an undergraduate and specialize through graduate studies.
- As the demand for university/college faculty positions decreases, most openings will exist in consulting firms and government agencies.
- To increase your employment opportunities with a bachelors degree, consider minoring or double majoring in another field such as sociology, business, urban planning, or public administration.
- Anthropology provides a solid background for a variety of graduate programs including law, medicine, forensics, or genetic counseling. Research admissions requirements and take prerequisite courses.
- Anthropology is good preparation for jobs that involve people skills and require an understanding of cultural differences.
- Spend a summer in field school or travel and study other cultures.
- Volunteer to help with a professor's research.
- Gaining relevant work experience through internships, practicums, part-time jobs, or volunteer positions is critical.
